

FIRE APPLIANCES

7-IN-1 QUIK ATTACK MULTI-SYSTEM

The Quik Attack Multi-System is the perfect combination of design and durability. The lightweight, versatile design is equipped to manage fires, burn offs, weed and pest control, amenities cleaning, watering and dust control.

The user friendly, cost effective slip-on is compact and fits any vehicle tray. The baffled tank is designed to reduce liquid surge, giving you increased stability while travelling. The unit is also available as a trailer.

The 7-in-1 Multi-System allows you to control and manage a range of tasks;

- | | | | |
|---|---|--|-----------------|
|  | Firefighting |  | Pest control |
|  | Herbicide spraying |  | Garden watering |
|  | High pressure amenities cleaning |  | Dust control |
|  | Maintenance cleaning of public facilities | | |

SPECIFICATIONS

- Quik Attack 1800 firefighting unit
- 9HP Honda petrol motor
- Bertolini PA530 pump
- RFR-2 electric powered hose reel
- Solid EF1000 wetting agent dispenser

- QCFE firefighting nozzle with 5mm tip
- Tank sizes available in 300L or 400L
- Tank UV resistant and baffled for safety while travelling
- Certified mounting kit
- Powder-coated framework
- 1800mm long x 1180mm wide (allow 70mm each side for mounting)

NOZZLES

For Firefighting

Designed for bush firefighting, the trigger allows for one hand operation.

For Chemical Use

Simply change the nozzle to the blue 2mm tip, rinse your tank with Quik Flush, and you're ready to transition from fire to spray.

For Amenities Cleaning

Simply change the nozzle to the 900mm wand with a fan tip, add Quik Cover to the tank and use as a wash-down and deodorising method for public amenities cleaning.

AGENT

The Solid EF dispenser is an alternative to liquid foam. The aluminium dispenser and biodegradable water solvent cartridges add wetting agent to your water. This makes firefighting more effective, by dampening the surface for longer. A 1kg block is equivalent to using a 20L drum of foam.

CLEANING PROCESS

Rinse tank twice to rid the tank and lines of chemical residue. Flush the tank once with Quik Flush to remove any remaining chemical residue and to lubricate the seals within the pump.

HOSE REEL UPGRADES

RFR-3 Self Guided

Self-guided powered hose reel with electric hose retraction. Compact design with enclosed motor.

RFR-4 Remote Control

Remote control hose reel with self-guided hose rollers. 100m remote range.
